Using

RefWorks

To Manage Your Literature

What is RefWorks?

Database software

….provided by the Library

….accessible via the web

Why use RefWorks?

- To organize your references….like an electronic filing cabinet
- To import your database search results
- To format your papers and bibliographies according to journal/style specifications
- To share references for team or department projects

Access on campus:
http://www.refworks.com/refworks

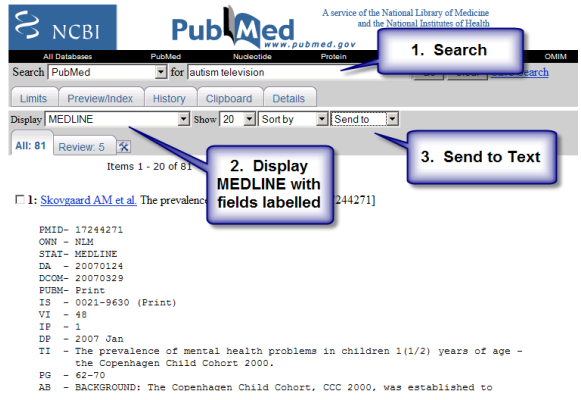
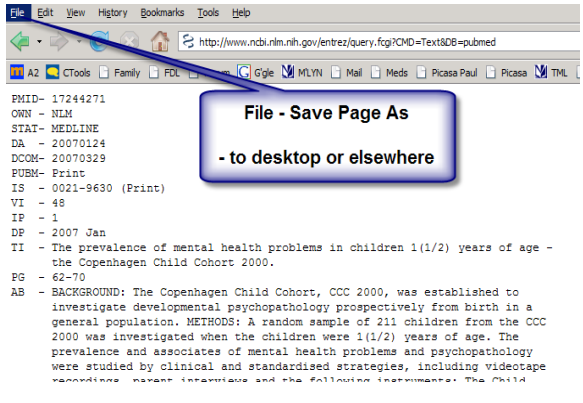
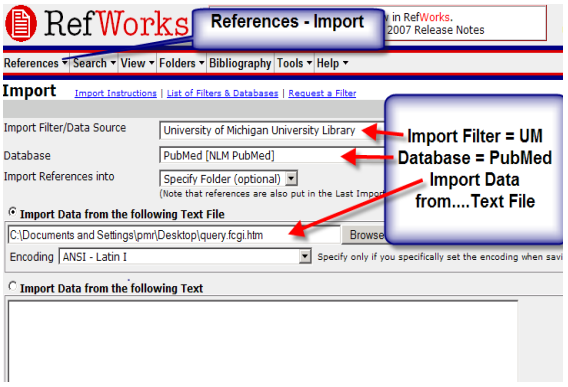
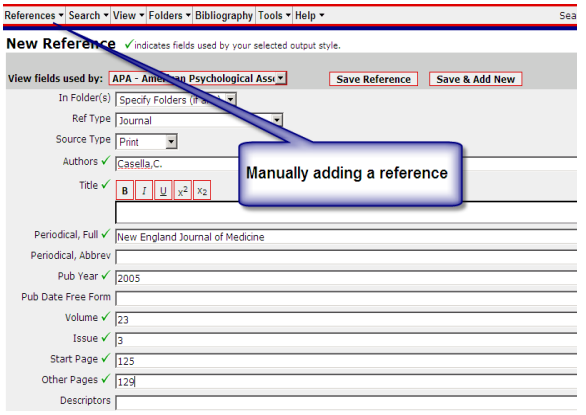
Recapping

- Direct Export is easy but not available in all databases. It is in UM-Medsearch, PsycInfo and Dissertation Abstracts.
- For other databases such as PubMed and Web of Knowledge, save your results as a text file and use File-Import in RefWorks.

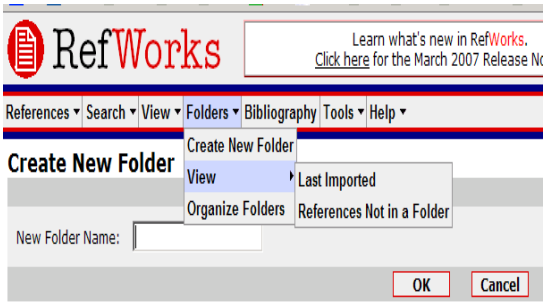


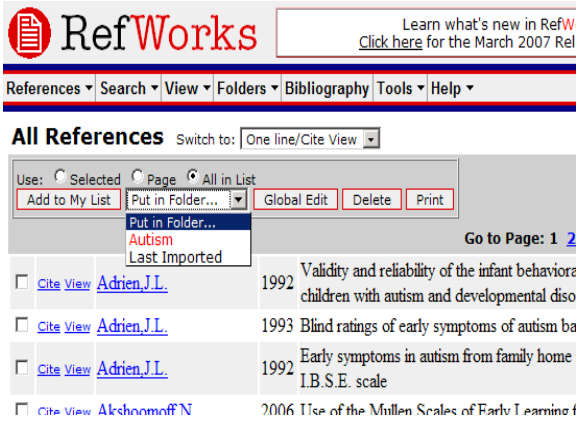




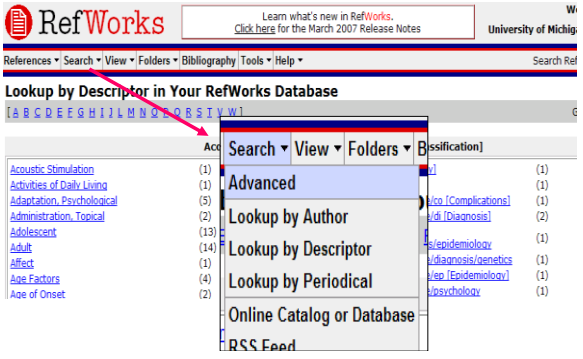


Use the Folders menu to create folders and organize your references





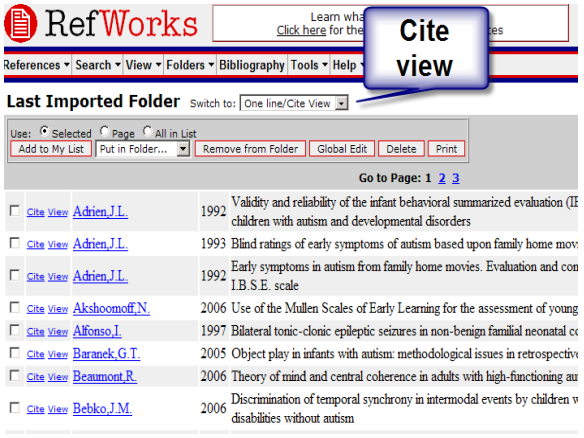
Use the Search menu to Lookup

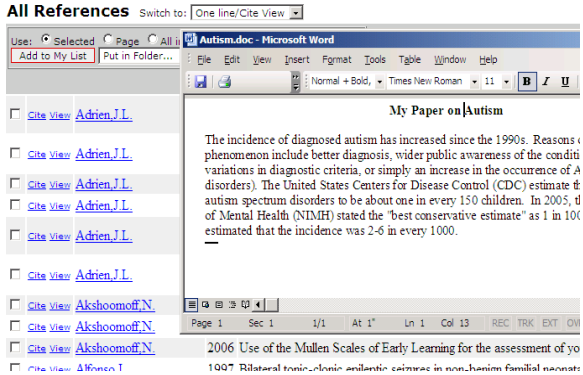


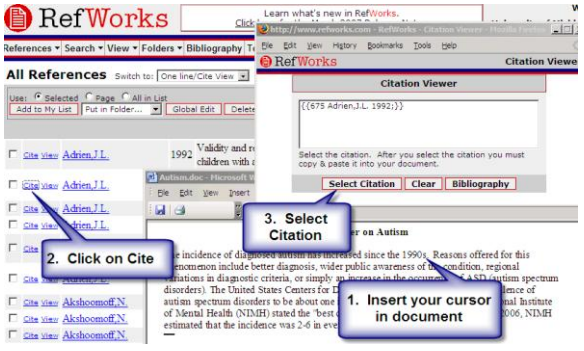
So far we've:

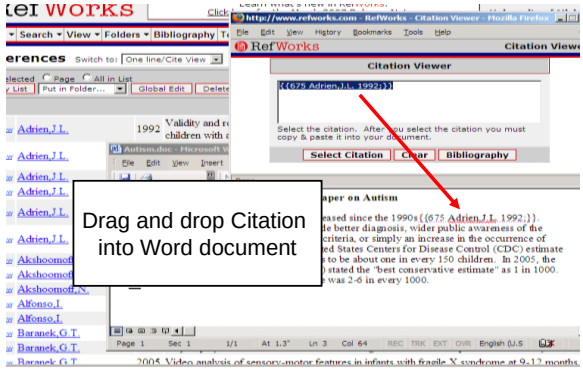
- Built our RefWorks library with references from UM-Medsearch and PubMed
- Learned how to add a reference manually
- Used folders to organize our references
- Looked at the Search menu

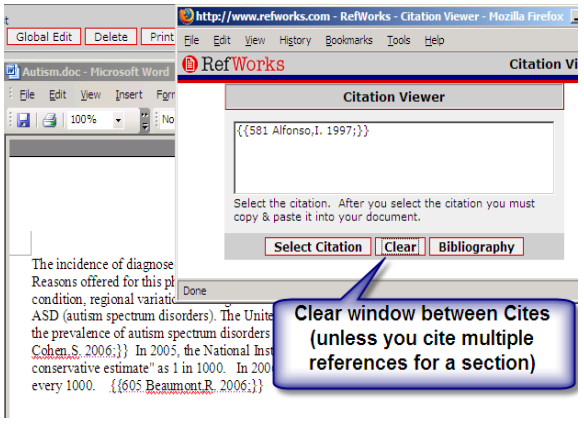
Now let's format a paper!



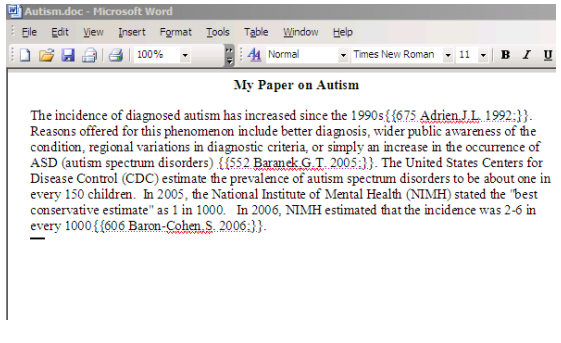


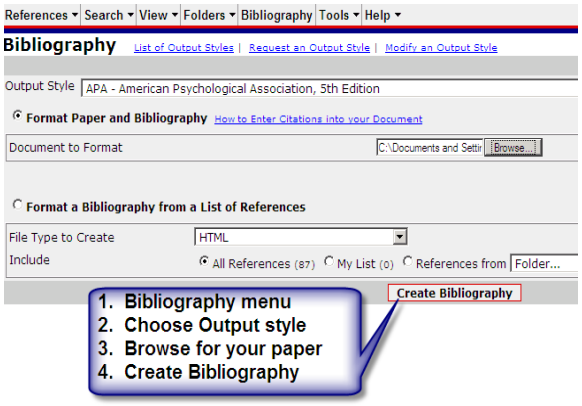


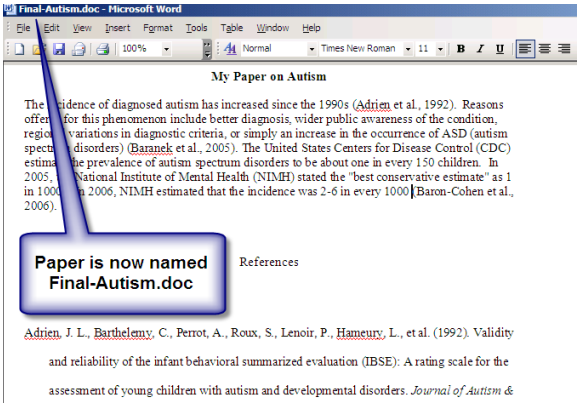




Save & close your paper







Important!

- Autism.doc is not formatted by RefWorks
- Final-Autism.doc is formatted by RefWorks

If you want to make changes, make them to Autism.doc and then reformat in RefWorks again.
